

International roll-out of Soliam within the Euler Hermes group

Louvain-la-Neuve, 19 August 2009

Soliam, the asset management solution of BSB, is being used by the Belgian entity of Euler Hermes since 2001 and by the French entity since 2003. Mid 2007, Soliam has been selected by Euler Hermes as the only software for asset management within the context of the FIT+1 project, which aimed the uniformization of the IT solutions used throughout the Euler Hermes group.

In 2008, the international roll-out of Soliam took place in the German, Italian and Belgian entities (the latter migrated towards the new platform of the group). The French entity joined the platform in the beginning of 2009; the Dutch entity followed some time later.

In the coming months, a new German entity and the British entity are expected to migrate towards the new platform.

BSB – www.bsb.com

BSB is a European group, founded in 1995. It is specialized in IT-services and publishes software specially designed for the financial sector. Its 225 team members are equally split in two major « divisions » : « services » and « software ».

The division « services » includes the « business » consulting activities (carried out by experts in mainly insurance and asset management), the tailor-made developments and the integration of third party software packages (SAP and IDIT).

The « software » department develops 2 software packages for the financial sector: Soliam (management of financial assets) and Solife (management of life insurances).

BSB is mainly active in Belgium, France, Luxembourg and Ireland. Since 18 July 2008, BSB is listed on Alternext, a division of Euronext
